

Canadian Water Filter

Your Health is our Business

PRODUCT CATOLOGUE

We believe in prevention

THANK YOU!

Thank you for taking some of your time to review the Canadian Water Filter incredible line of health products. There are very few investments we will ever make that are guaranteed to last us a lifetime and even less that will benefit us in such a way as to not only pay for itself, but more importantly, to provide the framework for a healthier lifestyle.

Eating healthy food, drinking pure water and breathing clean air are the most important things we can do for our bodies!

By making an investment with the Canadian Water Filter collection, you are making a commitment to take care of yourself and the one's you love.

Our mission is to provide you with the tools you need to live a healthier lifestyle. We provide you with the very finest quality of health and wellness products *all guaranteed to last a lifetime.*

Canadian Water Filter commits to always providing you products of the finest Quality, Durability and Value.

Your health is our business!

Your Health is our Business

What is Vacumatic Cookware ?

Vacumatic is a process of cooking your vegetables in a vacuum vapor. Other methods, such as steaming, boiling or Microwaving all bring the foods to 100 degrees Celsius, which is the temperature where the vitamins, minerals and nutritional goodness start to break down. When cooking in a vacuum vapor the temperature does not exceed 72 degrees Celsius (165 Fahrenheit) therefore retaining 98% of all the natural vitamins, minerals, colour and taste.

Without features such as the vapor seal, Vac-control valve, heat conducting inner cores that extends up the side your cookware, you cannot cook the proper Vacumatic Waterless way. This heat conducting inner core also offers energy savings, up to 70%, virtually paying for the cookware in a few years.

Save Time Save Money Save Health

Advantages of Vacumatic

Saves time:

- 7-ply construction allows for fast and even heat distribution
- Food cooks faster
- No stirring, food cooks from all sides, not just the bottom
- Vapor lock whistle, tells you when to turn it off
- No pot watching
- Creates a vacuum for fast, even cooking
- T304 surgical steel, hard durable surface
- Cleans up fast and easily
- Bake on top of the stove, faster than the oven

Saves Money:

- Lifetime warranty
- No replacement costs
- Less food shrinkage means a lower grocery bill
- Low heat cooking leads to energy savings
- Reduced oven use equals saved energy

Promotes Health:

- Retains nutrients through low moisture/low heat cooking
- Maximizes vitamin and mineral content
- Eliminates the need for oils
- Allows you to cook low fat
- Made with T304 surgical steel which is non-reactive
- No leaching of metals or chemicals into your food

Protects Flavor:

- Low moisture cooking retains natural food flavors
- Flavor is more concentrated, not watered down
- Eliminates the need for added salt

Lock-In Lid Storage

- Our specially designed self-storing covers can be stored in the pan while being hung from a rack, saving you the hassle of hunting for the right cover
- The self-nesting design also allows you to stack and store your cookware in the cabinet using a minimal amount of space
- Perfect for small kitchens

Cool Grip Handles

- Ergonomic design for a comfortable grip
- Handle stays cool on the stovetop
- Durable phenolic construction withstands oven heat up to 350 degrees
- A slide out ring ensures easy hanging

Your Health is our Business

Vacumatic Cookware vs. Store-Bought Cookware

Vacumatic cookware is engineered and constructed of the finest quality materials in the industry. The cooking surface, T304 surgical steel with titanium, is a non-chemically reactive surface that will not leach metals or chemicals into your food. The full body 7-ply design gives you the ultimate in even heat conduction. Canadian Water Filter's dedication to quality means a lifetime of healthy cooking.

Vacumatic

Here is a look at some other options:

Non-Surgical stainless steel cookware

- Poor heat distribution
- Must use oil or water
- Hard to clean
- Food can stick and burn

Non Stick-coated cookware

- Will typically scratch, chip & flake
- Most brands are not dishwasher safe
- Can leach chemicals into your food
- Not recommended to use on high heat
- Fumes from over heated pans can be harmful

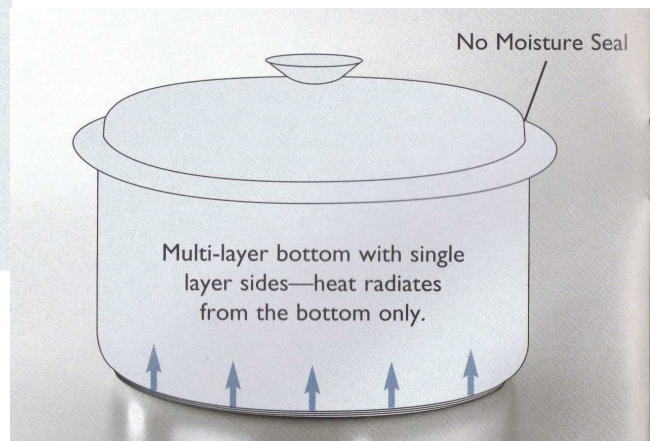

Aluminum Cookware

- Very soft metal, can pit and warp
- Can leach into your food when cooking acidic foods, such as tomato sauce
- Many brands are not dishwasher safe

Don't Be Fooled By Imitations

Many cookware companies advertise their cookware as multi-ply on the bottom of the pan. This creates uneven heat distribution, and the need to use excess water to cook. Vacumatic cookware is 7-ply on all sides, which distributes the heat perfectly for true vacuum waterless cooking.

Imposters

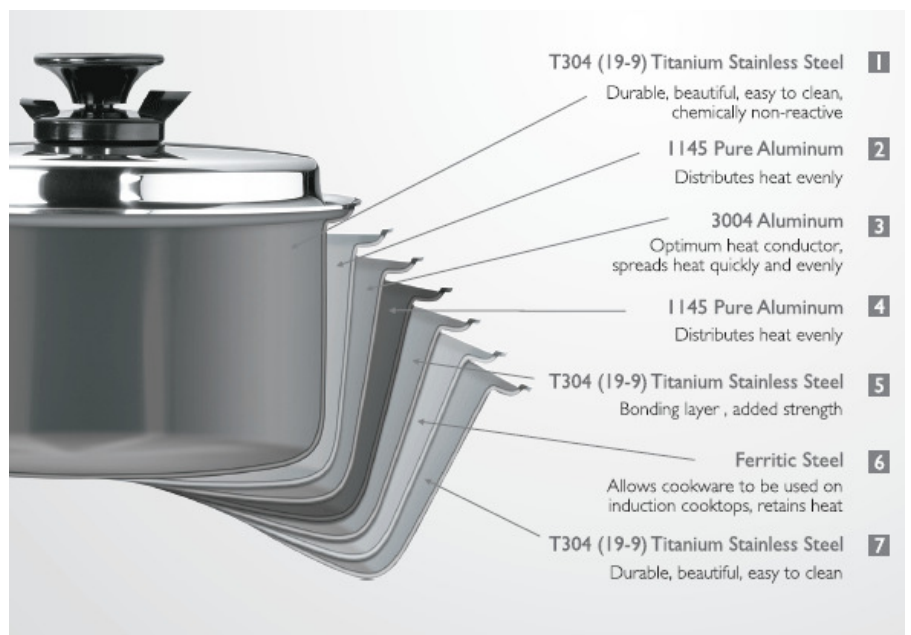

Your Health is our Business

The Seven Layer Difference

The Seven Layer Difference

Using advanced metal-working techniques and a 7-ply design on all sides, Vacumatic has layered pure aluminum and the finest surgical steel available to create cookware that is unequaled in efficiency and durability.

Vapor Lock Whistle

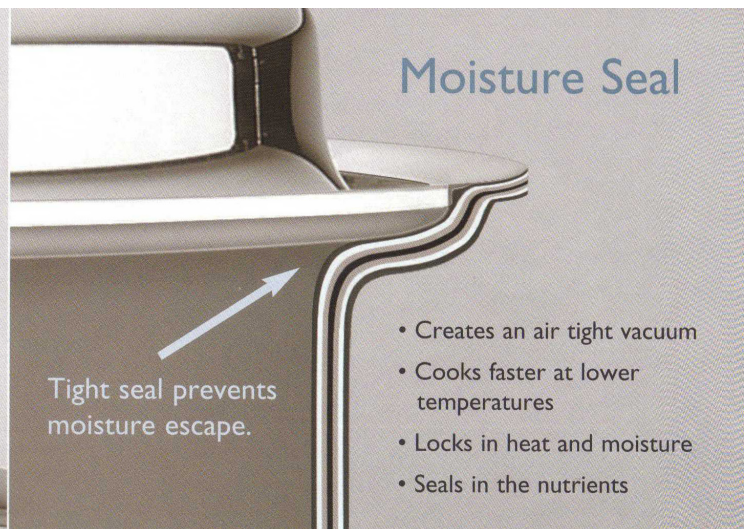

- Three settings in one knob: whistle, vent, closed
- Whistle setting lets you know the food has reached proper temperature
- Vent allows you to steam without the whistle
- Closed vent makes it a solid cover, which creates a vacuum seal

Moisture Seal

Tight seal prevents moisture escape.

- Creates an air tight vacuum
- Cooks faster at lower temperatures
- Locks in heat and moisture
- Seals in the nutrients

THE ONLY ELECTRICAL APPLIANCES IN THE
WORLD WITH A FULL 50 YEAR WARRANTY

Oil Core Essentials

The oil core liquid is sealed between layers of a superior quality carbon core stainless steel to provide the ultimate in heat conduction.

- Eliminates hot spots
- Keeps foods hot even after the skillet is unplugged
- Energy efficient

Goes from kitchen to table for serving convenience.

Oil Core 5 quart
Slow Cooker

Come Home To Dinner Cooking

- Stews
- Soups
- Pot Roasts
- Sauces
- Beans

So Many Everyday Uses

- Braise meats and vegetables
- Roast, fry or bake potatoes
- Prepare chicken or seafood
- Pan broil steak or chops
- Cook your vegetables without water
- Stir-fry meats or vegetables
- Create casseroles
- Poach fish or fruits

Oil Core Electric Skillet

Your Health is our Business

6qt (5.7L) Stainless Steel Slow Cooker

Features ceramic liner, phenolic handles, chrome top knob, and digital control panel.

Measures 19-1/4" x 14" x 14-3/4".

UL certified.

1.9qt (1.8L) Stainless Steel Interior & Exterior Rice Cooker

Features 120V, 700 watts, stainless steel liner, stainless steel steamer tray, phenolic handles, see-thru glass lid, and detachable cord. Measures 11-1/4" x 12" x 11-1/4". UL certified.

T-304 Stainless Multi-Baker/Roaster with Wire Rack

Bake a roast on the stove top to save energy and reduce heat buildup in your kitchen. Goes from the oven or stovetop, to the table, to the refrigerator!

Water Products

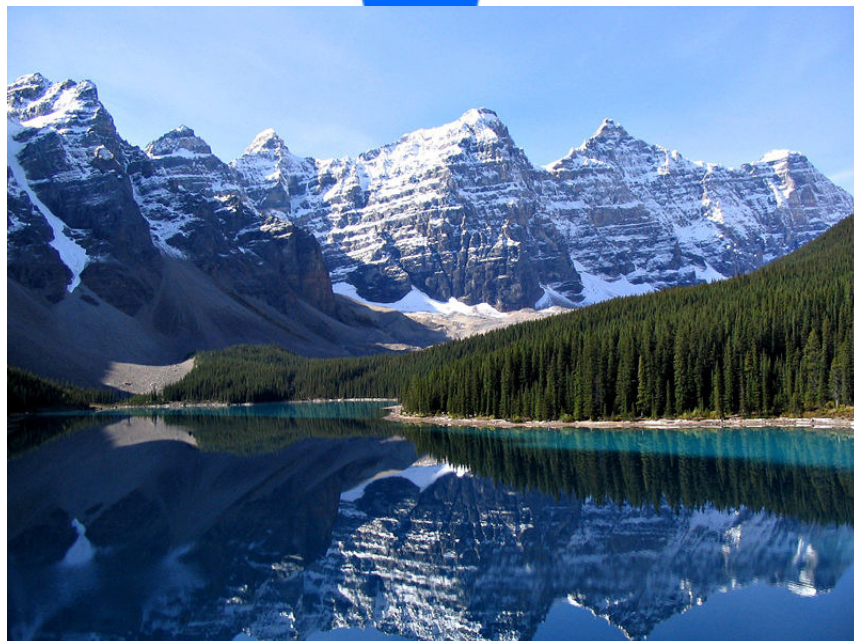

Your Health is our Business

Drink water like your life depended on it... because it does!

Why is water so important to our health?

Approximately two thirds of a person's body weight is water. blood is 63% water, the brain 75%, muscles 75%, lungs 80%, heart 75%, liver 85%, kidneys 63% and even bones are 22% water.

Your Options

BOTTLED WATER

Industry with little government regulation, standards or controls. Very expensive - 99% of cost is the bottle, transportation, advertising and profit. Large bottles and multi-packs are heavy and inconvenient to carry. No chlorine to prevent bacteria build up during storage. (usually months/years). Leeching of trace toxic phthalate and vinyl chloride from the bottle into the water. Toxic chemicals released into the environment during the manufacturing, disposal and recycling of 1.5 billion tons of plastic bottles each year and growing. Even spring water is subject to underground contamination.

SMALL PITCHER OR FAUCET MOUNTED FILTERS

Ineffective in the removal of toxic chemicals, heavy metals and harmful bacteria. The American Water Works Association has said small cartridge units are *"totally useless, because of their size and the brief exposure time."*

"Caution! The Brita water filter is not intended to purify water." (Brita packaging). And *"The presence of organic nutrients in carbon filters can promote bacterial growth, as quickly as overnight."* (City of Ottawa Water Purification website).

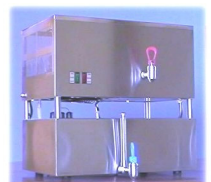

REVERSE OSMOSIS FILTRATION SYSTEM

Removes natural healthy minerals producing water that is flat and tasteless. Very slow process uses up to 8 gallons to produce 1 gallon of purified water. Chlorine and hot water adversely affect the RO membrane which can rupture without indication, allowing unfiltered water through to your stored water. This is a large and bulky system that is expensive to install and maintain.

WATER DISTILLATION SYSTEM

Removes natural healthy minerals producing water that is flat and tasteless. Expensive to install and maintain with high electricity consumption. Holding tank is subject to bacteria contamination. Ineffective at removing many pollutants, pesticides and THM's.

GRANULAR ACTIVATED CARBON FILTERS (GAC)

Will not remove all harmful bacteria or heavy metals from the water. Filter can quickly become contaminated with bacteria and sealed units are not cleanable (no replaceable cartridge), requiring premature disposal. GAC's permit water to forge channels through the carbon allowing unfiltered water to pass through. The silver nitrate can quickly escape into the drinking water. No washable pre filter to prevent clogging of the filter.

So what is my Best Choice?

From 'Alive' health magazine in an article comparing all water filtration methods; ***“The best type of filter to buy would be an activated carbon block filter with a sediment pre-filter to remove bacteria and parasites, and an automatic shut off point when the filter has reached its limit.”***

Let's take a look at what the Canadian Water Filter 'Full spectrum' four stage water purifier has to offer you:

The Full Spectrum ceramic/carbon block cartridge filters to 0.3 of a micron.

The diameter of a human hair is about 100 microns, human cells 10 microns and bacteria as small as 3 microns. The ceramic filter is impregnated with silver which kills bacteria on contact .

Filters out harmful bacteria, parasites and viruses including gardia lambia cysts, cryptosporidium, ecoli, fecal coliforms, hepatitis B and salmonella.

Filters out toxic chemicals including dioxins, arsenic, asbestos, benzene, nitrates, PCB's and carcinogenic chlorination bi-products namely Trihalomethanes or THM's.

The highly compressed carbon block filter is equivalent to water traveling through 300,000 square yards of filtration media, ensuring only the purest drinking water.

Significantly reduces heavy metals including lead, mercury, aluminum, iron, copper and silver.

The washable sub-micron ceramic pre-filter prevents clogging of the purifier, extending its effective life and acting as an automatic warning indicator.

Simple to clean and service.

Made in Canada.

Full 50 year warranty.

HERE'S HOW IT WORKS

First the water passes through our unique sub-micron "NSF Certified" Ceramic. This Ceramic is silver impregnated to prevent bacteria growth. Here thousands of microscopic pores stop all suspended matter down to 0.3 microns which includes harmful bacteria, asbestos, cryptosporidium, e-coli, salmonella, parasites, micro-organisms, cysts, and more.

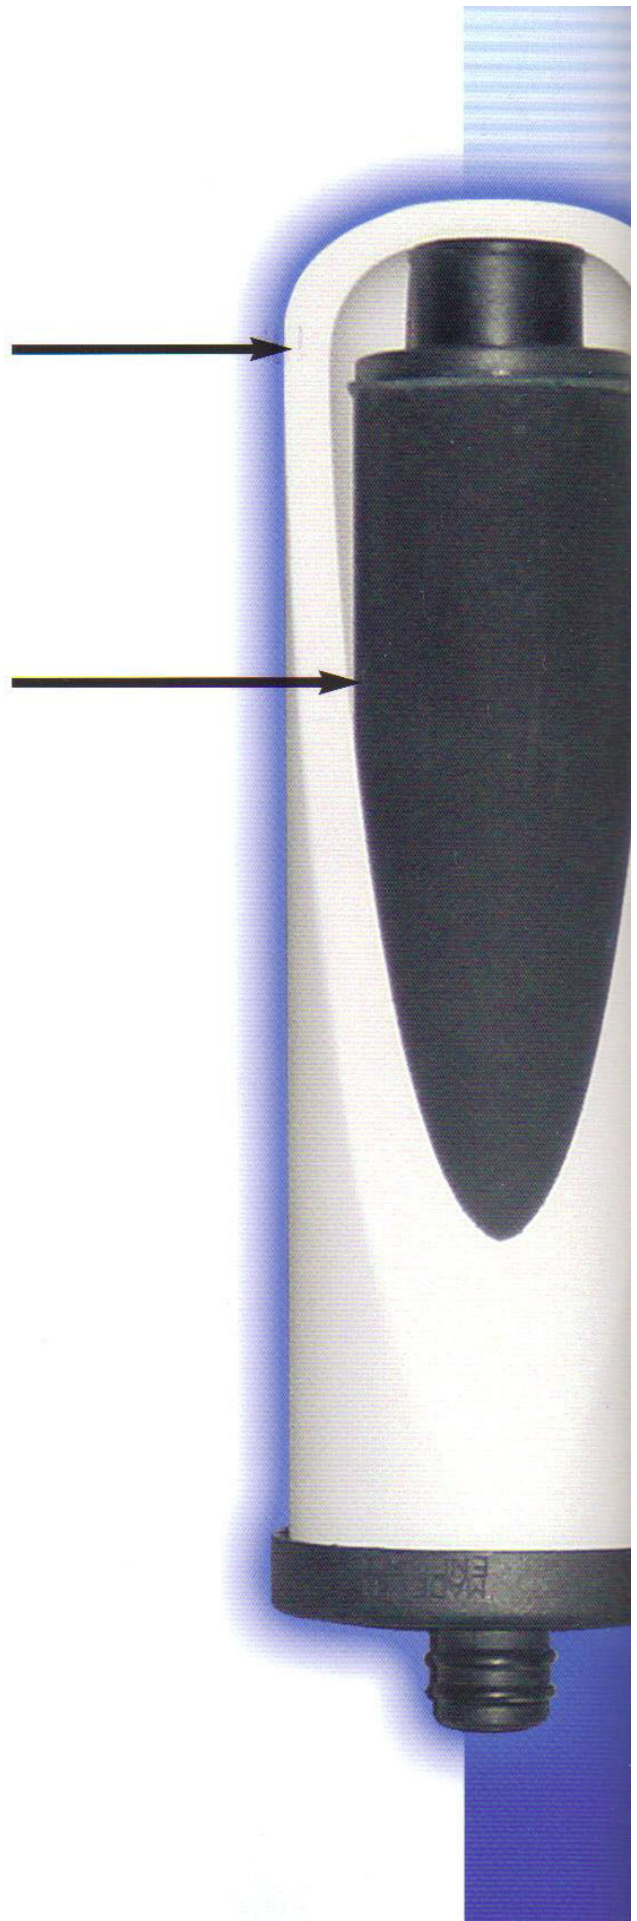

At this point your water has been stripped of all suspended matter, yet the filtration process has just begun.

The filtering process continues through the "NSF Certified Inner Core Activated Carbon Block", which is specifically created to remove *heavy metals such as lead, mercury, MTBE & BTEX (petroleum and crude oil by-products) and cadmium, just to name a few.*

The final stage, contains a special combination of compressed carbon. This compression method gives you a carbon block that is the equivalent of approximately 300,000 square yards of media. *This removes a host of chemicals including THMs, chlorine, chloramines, chloroform, sulfides, pesticides, herbicides, insecticides, VOC's and more in addition to bad tastes, color and odors.*

The water leaving your system is now cleaner, safer, fresher tasting and crystal clear!

The way **nature** intended.

Shower Filters

WSF SHOWER FILTER

The high quality WFS shower filter provides excellent performance reducing chlorine, VOC's and other chemical contaminants commonly found in municipal water filter. The KDF-55 media inside the shower filter uses advanced redox (reduction-oxidation) technology to provide a more healthful shower. At 1 year, simply discard the unit and replace.

Softer skin and hair in 2 weeks - Guaranteed!

100% KDF-55 media

Will not rust or corrode

Date ring allows you to set the month the filter need to be replaced

Lasts up to 1 full year

PURE BATH 6 STAGE SHOWER FILTERS

The most powerful multi-stage shower filter on the market.

- The ANISOTROPIC FERRITE MAGNET in the Pure Bath shower filter create a softer, more energized shower feel and improves both lathering and sudsing.
- Unlike other dechlorinating shower filters, the Pure Bath is specifically engineered for efficiency and performance.
- Its unique multi-filtration design provides the best shower experience available for you and your family.

Main Components: Anisotropic Ferrite, Magnet Carbon Filtration, Activated Ceramic Balls, Calcium Sulfite, KDF

Eclipse Shower Filter

The Eclipse Shower Water Purifier Filtration System uses a premium grade activated carbon in a replaceable cartridge to achieve superior and consistent free chlorine reduction for virtually any water supply. Comes complete with hand held wand with 5 adjustable spray settings. Simple to install and maintain. Cartridges can be custom made to suit your needs.

***Available in Chrome, Brass and Brushed Nickel finish
Designer cartridges available:***

The **6 stage Custom Cartridge** is created according to the type of water you have.

Travel and Gravity Filters

CANADIAN WATER FILTER STRAW FILTER

“The World's Smallest Water Filter In A Straw” Now for the first time, you can drink fresh, clean water wherever you go. It's small enough to fit in your pocket, yet effective enough to reduce contaminants from water, glass after glass, month after month.

The Canadian Water filter Gravity housings are manufactured from polished stainless steel or polypropylene. It comes with one or two Doulton ceramic water filter candles. The upper chamber is filled with water which then gravity feeds through the Doulton ceramic water filter candles into the lower chamber.

- 100% of live *Cryptosporidium*
 - 100% of *Giardia Lamblia* Cysts
 - 99.9% of:
 - E. Coli
 - Vibrio Chloerae*
 - Salmonella*
 - Typhii*
 - Shigella Dysenteria*
 - Klebsiella*
 - Terrigena*
- And a wide range of other
contaminates and a variety of
bacteria and viruses, including
*Anthrax spores and more.

Air Purifiers

THE U.S. ENVIRONMENTAL PROTECTION AGENCY SAYS:

Of all environmental problems, indoor air pollution is one of the greatest threats to public health.

The air you breathe indoors may be up to 25 times, and occasionally more than 100 times more polluted than outdoor air!

what you CAN'T see CAN hurt you

99% of pollutants are so small that they are invisible to the naked eye!

- Bacteria
- Viruses
- Pollen
- Formaldehyde
- Asbestos
- Dust Mites
- Germs ...

enter your lungs every day

invisible DUST MITES fill the air!

Thousands of these microscopic crab-like creatures can live in a single ounce of dust! They cause a variety of health problems, and are found in every home and office!

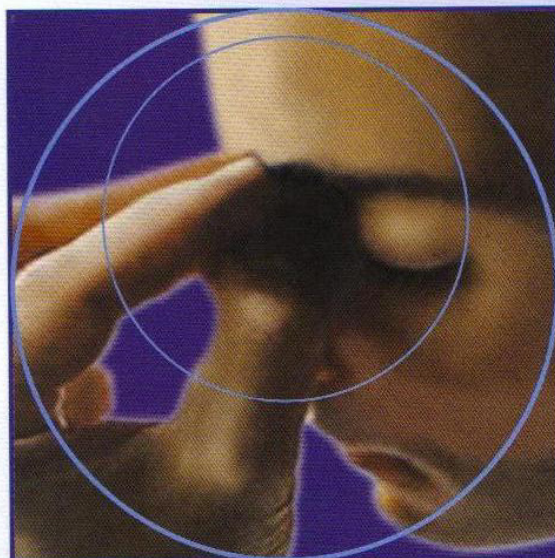

bad, stale air in your home can cause:

- eye, nose, throat and lung irritations
- colds & flu
- sneezing & wheezing
- headaches
- fatigue
- asthma & allergy symptoms
- waking up with puffy eyes, a sore throat, or a stuffed up nose

...and more

SOURCE: U.S. Environmental Protection Agency

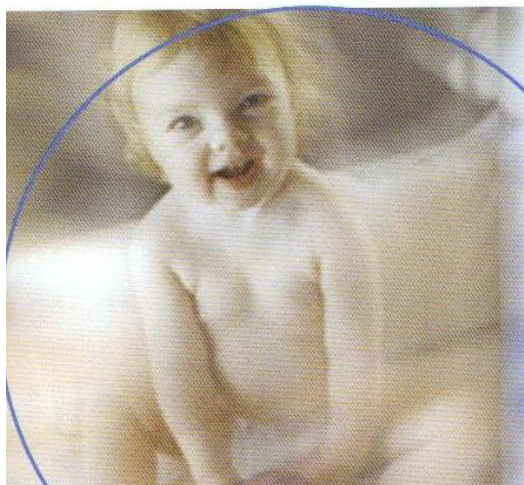

where do pollutants come from?

germs from people
pet dander
carpeting/upholstery
drapes/curtains/blinds
dust and dust mites
drains and bathrooms
household chemicals

pesticides
tobacco smoke
dry cleaning chemicals
paint & solvents
aerosol sprays
insulation/asbestos
air conditioning & heating systems

and many other sources

Children and the elderly are
most vulnerable, but
no one is immune to
the **hazards** of indoor
air pollution.

PORTABLE UNITS

XR-20 'Auto Unit'

Class: Portable Filtration System

Delivered Airflow: 20 CFM

(Cubic Feet per Minute)

Dimensions: 8" round, 3.5" high

Control:: on/off

Power Consumption: 12V DC

Outflow: 360°

Filter Life:

- 1st Stage: Activated Carbon V.O.C. Filter
- 2nd Stage: Electret Charged Media
- 3rd Stage: Zeolite V.O.C. Filter

Model 300

Class: Portable HEPA Filtration System

Delivered Airflow: 20-40 CFM

(Cubic Feet per Minute)

Dimensions: 8.5" round, 7.5" high

Control:: 3 position, 2 speed switch

Power Consumption: 12V DC

Outflow: 360°

Many colors to choose from

Filter Life:

- Pre-Filter: Washable (12 months)
- HEPA Filter: 2-5 years
- Carbon Filter: 6 months
- Optional V.O.C. Canister: 12 months

IDEAL FOR OFFICE, HOME OR WORK PLACE
(Available in white, black or beige)

Model 1200

Class: Portable HEPA Filtration System

Delivered Airflow: 175 CFM

(Cubic Feet per Minute)

Dimensions: 16" hex, 13.5" high

Control: three speed

Cartridge Replacement Timer

Power Consumption: 84 Watts

Outflow: Vents on 4 (of 60) sides,
vented downwards

Available in Black, White or Beige

Filter Life:

- Pre-Filter: 3-6 months
- HEPA Filter: 2-5 years
- Carbon Filter: 6 months
- Optional V.O.C. Canister: 12 months

Model 1700

Class: Portable HEPA Filtration System

Delivered Airflow: 225 CFM

(Cubic Feet per Minute)

Dimensions: 16" hex, 23" high

Control: three speed

Cartridge Replacement Timer

Power Consumption: 84 Watts

Outflow: Vents on 4 (of 60) sides,
vented downwards

Nutri-Tech[®] air purification system

**"Deluxe"
with Ozone**

The Ozone Low/High output switch is located in the rear of upper cabinet. Low is suggested for occupied areas. High for unoccupied areas.

Conveniently
operated by
remote
control or set
automatically
with a
programmable
timer.

The Deluxe Model is designed for use in areas where there are strong odor problems. The deodorizing stage creates ozone (O_3) which attacks and oxidizes the odors in the room and removes them from fabrics and carpets.

It turns impure, odor-filled air into a clean, fresh environment, utilizing advanced, state-of-the-art ozone/oxidation technology.

It is truly
"nature's natural sanitizer!"

pure air, the way nature intended.

the **Nutri-Tech®** "Compact"

The Nutri-Tech® "Compact"

air filtration system is designed
for smaller areas.

It contains a 4-stage filtering
cartridge with an additional
ionization stage and ozone stage
for maximum protection against
contaminants and odors. The three
speed motor provides effective air
cleaning performance and will
clean a 375 square foot area two
times an hour.

This state-of-the-art filtering
cartridge system removes a wide
range of contaminants, gases,
chemicals and odors from the
environment.

The replaceable filtering
cartridge consists of a PureTech
Pre-Filter, followed by a H.E.P.A.
Filter, then an Anti-Microbial Filter
and finally an Activated Charcoal
Filter.

When the air filtration system is in use, the ionization
stage feature emits a continual mild charge of negative
ions that help freshen stale air.

The ozone stage offers a time controlled ozone
generating feature to be used as necessary when odors
are stronger.

Breathe easier with Nutri-Tech®!

Designed to protect you and your family from a wide range of contaminants*

Protection from A to Z

Acrylonitrile	Cresol	Heptane	Ozone
Adhesives	Crotonaldehyde	Heptylene	Paint odors

Cigarette smoke/odor	Fumes	Nonane	Xylene
Cleaning compounds	Garlic	Octalene	Zinc acetate
Cooking odors	Gasoline	Organic chemicals	

* The above is a partial list of airborne particles, chemical compounds, vapors, gases, and fumes designed to be removed or reduced by the components/construction of Nutri-Tech® Air Purification System.

Yes, Independent laboratory tests confirm its efficiency.

Yes, You can order with complete confidence because Nutri-Tech® air purification systems have been designed, engineered and tested to deliver the best possible all-around performance and value available in the world today!

JUICE EXTRACTORS

DISCOVER THE POWER OF JUICING!

Juicing helps you make healthier eating Choices. Research studies have repeatedly shown direct relationship between diet and health. Doctors and healthcare practitioners alike are discussing how to decrease the risk of heart disease and certain cancers through proper diet.

Current recommendations are to increase the intake of fiber and complex carbohydrates, and decrease the intake of fat, cholesterol, sugar and sodium. With the Canadian Water filter Juice Extractors, you have the opportunity to make changes in your diet and increase your intake of fiber and complex carbohydrates. The Canadian Water filter juicers are designed to make the preparation of fruit and vegetables juices easy and convenient. Enjoy fresh fruits and vegetables in their prime and quickly prepare them to fit your family's needs and dietary plans.

Knives

Your Health is our Business

You can purchase sets or individually

Muller Collection

14 Piece Muller Carving Block with Pakka Wood Handles

Pakkawood is an outstanding material of exceptional quality and long-lasting beauty.

- Beautiful • Strong and durable
- Dimensionally stable • Weather and moisture resistant

8 Piece Muller Ultra-Contemporary with Acrylic Stand

- Full Tang Blades
- High Quality
- Looks Stunning in any Modern Kitchen
- Available in Black or White Handles

Muller and Carl Weill Cookware Sets

If you are looking for a less expensive set of cookware but still better quality than anything available in the stores, the Muller and Carl Weill cookware and sock pots are ideal.

QUALITY FEATURES:

- High-quality 18/10 surgical steel
- Thermal sandwich base
- Fast, even heat distribution
- Suitable for gas, ceramic, halogen and induction ranges
- Healthy cooking; Waterless, no oils or fats
- Dripless rim design for easy pouring
- Stay cool safe grip handles
- Temperature gauge on the lids

The Muller 13 piece set

1,200 tons of pressure is used to affix the 'Accuthermal' compact-base to the bottom of our thermo cookers. This compact base is the key to Muller's energy-saving method.

Made of several light metal alloys, it enhances heat conductivity so that heat is evenly distributed and stored. This engineering feature enables food to be cooked on a low setting and in less time than traditional cookware, increasing energy saving up to 70%!

One of the major advantages of Muller's unique cooking system is that different cooking units can be stacked in order to cook multiple dishes using only one burner or hot plate.

PL Line of Waterless Cookware

ENERGY EFFICIENT • T304 STAINLESS STEEL • LIFETIME GUARANTEED

NUTRITIONAL FOOD PREPARATION

Multi-layers of heat conducting metals spread heat quickly and evenly eliminating the need for oil. A vapor seal creates a vacuum in each pan and eliminates the need for excess water as well. Foods prepared the waterless, low-temperature way retain more vitamins and minerals.

The Tri-Tone vent makes it possible to cook in a vacuum vapor.

FEATURES OF PL WATERLESS COOKWARE

CONDENSING GROOVE AND SEMI-VACUUM LID

The semi-vacuum lid is constructed to insure a perfect fit.

The condensation groove collects air and water to create an almost air tight seal.

This eliminates evaporation and unpleasant cooking odors all while retaining precious nutrients.

TRI-TONE WHISTLE VENT

In music, tri-tone refers to a chord comprised of three whole tones.

With the PL Line cookware the Tri-Tone Whistle® creates a different kind of harmony: time, money, health.

When the desired temperature is reached, the Tri-Tone Whistle® alerts you to turn down the heat. There is no need to lift the lid or stir the food to prevent scorching or burning.

STAY COOL ERGONOMIC HANDLES

These durable welded handles with flame guards, makes for a more solid hold.

The units are comfortable to carry, since the handles do not heat up

PENTACORE

The special PentaCore Compact Base, with the force of 1600 tons, becomes inseparably adhered to the 1.2mm thick body made out of several light-metal layers.

This allows for high energy efficiency, while quickly and evenly spreading heat over the entire surface.

Notes

[illegible]

We hope you have enjoyed previewing the Canadian Water Filter Collection

When making a buying decision, we believe in giving you the personal attention that you deserve, therefore our Quality line of products are only available through private showings with an authorized Canadian Water filter representative. This method of marketing allows you to avoid high retail mark ups and also shop from the convenience of your own home.

The greatest gift that anyone of our clients can give us is for their word of mouth advertising, and below are just a few of the wonderful premiums that we reward you with for hosting your own Canadian Water filter showing.

Help the people that you care about the most by introducing them to this amazing line of health and wellness products.

It's easy, fun and best of all, you'll receive one or more of these fantastic gifts simply for opening your home to certified Canadian Water filter representative and the Canadian Water filter Experience.

Let us share with you the Canadian Water filter Experience, nutrition designed to enhance your lifestyle through proper food preparation, clean water and air.
